Policy for Women Empowerment

1. Preamble:

In order to have a better understanding of the concepts of equality and nondiscrimination, the two fundamental aspects of our constitution, there is a need to understand the basic concepts like difference between sex and gender, gender stereotypes, gender division of labour, gender discrimination, gender based violence, masculinity, patriarchy, gender equality and so on. These concepts are necessary to understand because "the gender question is not just about women and men and how they interact (the gender question, Human development report, 2000) but understanding these concepts would help in sensitizing people about curbing the gender biases prevailing in the society and would help in empowering girls and women to achieve their goals. We all need to understand how gender roles lead to gendered division of labour, how it enable participants to understand gender discrimination based on stereotyping of male and female qualities. We also need to understand the social pressures, benefits and costs for men and women to conform to dominant gender roles. Now, we must know why gender equality is needed: Gender equality is not only a fundamental human right, but is a necessary foundation for a peaceful and sustainable world for building prosperous humanities.
